

Endevor: Administrator (Level 200)

COURSE CURRICULUM | INSTRUCTOR-LED VIRTUAL TRAINING

5
TRAINING DAYS

20 hrs
TOTAL DURATION

4 hrs/day
DAILY SESSION

8
CORE MODULES

DAY
1

Foundations & Inventory Structure

DURATION 4 hours
MODULES 2

Module 1 Introduction / Overview

- Key features of Endevor
- Core concepts and terminology
- Inventory structure and management
- Additional features and available plug-ins

Module 2 Agile and Concurrent Development Configuration

- Enabling developer sandbox subsystems mapped to the code trunk
- Recommended sandbox development workflow
- Resolving change conflicts from concurrent development
- Configuring Endevor to support concurrent development

DAY
2

Building the Inventory Structure

DURATION 4 hours
MODULES 1

Module 3 Create the Inventory Structure

- Creating a system, subsystem, and type
- Defining element registration
- Updating the type processing sequence and type data set definitions
- Creating inventory structures using the Batch Admin utility

DAY
3

Processor Groups & Processors

DURATION 4 hours
MODULES 2

Module 4 Create Processor Groups

- Creating processor groups
- Understanding symbols and processor flexibility

Module 5 Manage Processors

- Building processors
- Testing processors
- Running move and delete processors

DAY
4

Maintaining Processors & Package Management

DURATION 4 hours
